BISWAJEET PRADHAN

Data Scientist | Data Analyst | WEBSITE - https://biswajeet-pradhan-portfolio.vercel.app/
+91 7848884936 | biswajeetpradhan36933@gmail.com

SKILLS

Machine Learning	: Python, SQL, NumPy, Pandas, Scikit-learn, AWS,
Optuna, Deep Learning	: NLP, CNN, ANN, TensorFlow, PyTorch, Keras
Visualisation	: Power BI, Tableau, Matplotlib, Seaborn,
Excel Web & Deployment	: Flask, Streamlit, HTML, CSS, Selenium

EXPERIENCE

- **Unified Mentor | Data Science Intern** (Remote) **[03/2026 to 09/2026]**
  As a Data Science Intern, I conducted detailed exploratory data analysis (EDA) and statistical modeling on large-scale datasets using Python (Pandas, NumPy), data cleaning to improve data quality. I built, and deployed machine learning classification and regression models using Optuna, and applying cross-validation techniques.
- **Lancesoft Inc. | HR Recruiter** (Bhubaneswar, Odisha) **[12/2024 to 04/2025]**
  Managed the end-to-end recruitment lifecycle for US healthcare clients, utilizing ATS software to track candidate pipelines and successfully negotiate offers.
- **Tech Mahindra | Customer Service Associate** (Bhubaneswar, Odisha) **[08/2024 to 12/2024]**
  Provided technical support and resolved complex escalations for high-value enterprise e-commerce accounts, maintaining excellent customer satisfaction ratings.

CERTIFICATIONS

1. IBM Data Analytics Certification
2. Supervised Machine Learning by Andrew Ng.

PROJECTS

1. **Optical Character Recognition**
   - Made a full-stack Optical Character Recognition **(OCR) web application** using Python and Streamlit to automate **text extraction** from unselectable documents. The system integrates **PyTesseract** for rapid **image-to-text** conversion and **PyPdfium2** for iterative, **page-by-page PDF** parsing and rendering. Designed a side-by-side frontend interface for real-time data verification, successfully optimizing the backend pipeline to accurately extract computerized text and eliminate manual data entry bottlenecks.
2. **Image Captioning**
   - Developed an end-to-end multimodal Image Captioning application using Python, **Streamlit**, and **PyTorch** to generate context-aware natural language descriptions for complex images. Integrated **Salesforce's BLIP** (Bootstrapping Language-Image Pre-training) architecture via **Hugging Face Transformers**, utilizing a **Vision Transformer (ViT)** backbone paired with cross-attention text decoding. Engineered both unconditional scene captioning and prompt-guided conditional generation with **PIL** image preprocessing and optimized decoding strategies (**Beam Search**).
3. **Object Detection**
   - Built a real-time **Computer Vision** platform utilizing Python, Streamlit, and **YOLO26** architecture to classify **over 100 distinct objects** across images, video files, and live camera feeds. Managed memory-intensive video processing through **OpenCV** frame reconstruction and **PIL** array conversions. Resolved cloud-hosting latency issues by configuring **WebRTC** with remote **STUN** servers, enabling lag-free HD webcam inference through alternating-frame execution.

EDUCATION

- **MCA with Specialization (Data Analytics)**
  Jain University | Bangalore (from June 2024 – June 2026)
- **Bachelor of Arts (Economics Hons.)**
  Netaji Subhas Chandra Bose College (June 2018 – June 2021)

DECLARATION

I solemnly declare that all the facts and details mentioned in this curriculum vitae are true and authentic. I bear the responsibility for the correctness of the above-mentioned particulars.

(Biswajeet Pradhan)
