BISWAJEET PRADHAN

Data Scientist | Data Analyst
7848884936 | biswajeetpradhan36933@gmail.com

EDUCATION

- **MCA with Specialization (Data Analytics)**
  Jain University | Bangalore (from June 2024 – Present)
- **Bachelor of Arts (Economics Hons.)**
  Netaji Subhas Chandra Bose College (June 2018 – June 2021)
- **12th**
  Gangadhar Meher University College (June 2016 – June 2018)
- **10th**
  Saraswati Sishu Vidya Mandir (2016)

SKILLS

Machine Learning	: Python, SQL, NumPy, Pandas, Scikit-learn, AWS, Optuna,
Deep Learning	: NLP, CNN, ANN, PyTorch, Keras
Visualisation	: Power BI, Tableau, Matplotlib, Seaborn, Excel
Web & Deployment	: Flask, Streamlit, HTML, CSS, Selenium

EXPERIENCE

- **Unified Mentor | Data Science Intern** **[03/2026 to 09/2026]**
  As a Data Science Intern, I conducted detailed exploratory data analysis (EDA) and statistical modeling on large-scale datasets using Python (Pandas, NumPy), data cleaning to improve data quality. I built, and deployed machine learning classification and regression models using Optuna, and applying cross-validation techniques.
- **Lancesoft Inc. | HR Recruiter** **[12/2024 to 04/2025]**
  Bhubaneswar, India
  Managed the end-to-end recruitment lifecycle for US healthcare clients, utilizing ATS software to track candidate pipelines and successfully negotiate offers.
- **Tech Mahindra | Customer Service Associate** **[08/2024 to 12/2024]**
  Bhubaneswar, India
  Provided technical support and resolved complex escalations for high-value enterprise e-commerce accounts, maintaining excellent customer satisfaction ratings.

CERTIFICATIONS

1. IBM Data Analytics Certification [LINK]
2. Supervised Machine Learning by Andrew Ng. [LINK]

PROJECTS

1. **Optical Character Recognition** [LINK]
   - Made a full-stack Optical Character Recognition **(OCR) web application** using Python and Streamlit to automate **text extraction** from unselectable documents. The system integrates **PyTesseract** for rapid **image-to-text** conversion and **PyPdfium2** for iterative, **page-by-page PDF** parsing and rendering. Designed a side-by-side frontend interface for real-time data verification, successfully optimizing the backend pipeline to accurately extract computerized text and eliminate manual data entry bottlenecks.
2. **Object Detection** [LINK]
   - Built a real-time **Computer Vision** platform utilizing Python, Streamlit, and **YOLO26** architecture to **classify over 100 distinct objects** across images, video files, and live camera feeds. Managed memory-intensive video processing through **OpenCV** frame reconstruction and **PIL** array conversions. Resolved cloud-hosting latency issues by configuring **WebRTC** with remote **STUN** servers, enabling lag-free HD webcam inference through intelligent alternating-frame execution.
3. **Sign Language Reader** [LINK]
   - Developed a real-time **Indian Sign Language (ISL)** translation model using Python, TensorFlow, and Streamlit to accurately classify **36 distinct alphanumeric hand gestures** (0-9, A-Z). Engineered an

end-to-end Computer Vision pipeline using **OpenCV** and **NumPy** to decode, resize, and process raw image bytes into optimized tensor arrays for deep learning inference.

4. **Sentiment Analysis for Social Media Brand Management** [LINK]
   - Created a machine learning model to classify social media feedback into positive, negative, and neutral sentiments, aiding in brand reputation tracking. Used a text processing pipeline using **TF-IDF** and **lemmatization**, training the model with using **XGBoost**. Optimized model hyperparameters using **Optuna (Bayesian optimization)** to maximize classification accuracy and prevent overfitting.
5. **Real Estate Investment Profiling and Buyer Segmentation** [LINK]
   - Developed an end-to-end machine learning system using Python and Scikit-Learn to segment real estate buyers and profile investment behaviors. Preprocessed raw demographic data using Pandas and trained an **unsupervised clustering model** to identify distinct purchasing patterns. Finally, I built and deployed an interactive web dashboard using **Streamlit** and Plotly, enabling stakeholders to visualize these live insights and optimize their market strategies.
6. **Late Delivery Risk Prediction in Global Supply Chain Analysis** [LINK]
   - Built a predictive ML framework analyzing 180,000+ shipment records to forecast late delivery risks before dispatch for APL Logistics. Applied **target encoding** on 15 spatial attributes, tuned ensemble models (**XGBoost, Gradient Boosting**) via **Optuna**, and resolved an 86.4% target leakage issue to ensure pre-shipment accuracy. Deployed a real-time Streamlit risk-scoring web app and a 3-page Power BI executive analytics dashboard.

DECLARATION

I solemnly declare that all the facts and details mentioned in this curriculum vitae are true and authentic. I bear the responsibility for the correctness of the above-mentioned particulars.
